High Tech Investment Fund s.r.o. is registered with the Czech National Bank (CNB) in accordance with Section 15 of Law No. 240/2013 Sb., on Management Companies and Investment Funds (ZISIF). The Czech National Bank (CNB) does not supervise the activities of High Tech Investment Fund s.r.o. as a company specified in Section 15 (1) Law No. 240/2013 Sb., on Management Companies and Investment Funds, but High Tech Investment Fund s.r.o. fulfills reporting obligations in accordance with paragraph 1 of Article 110 of Commission Delegated Regulation (EU) No 231/2013 supplementing Directive 2011/61/EU of the European Parliament and of the Council

What is the product?

TYPE. HIGH YIELD BOND is an actively managed portfolio of collective investment instruments.

PURPOSE: The purpose of the fund is to achieve an increase in the value of the portfolio within the recommended investment time horizon. No leverage is used when investing. The Fund manages funds mainly by investing in such low-risk financial instruments as bonds, as well as acquiring shares of companies conducting IPOs* on the American stock market and shares of the world's largest companies that are part of the S&P500 Index*. In this regard the funds are distributed as follows:

IPO Sector	Up to 20%
S&P500 Index Stocks	Up to 40%
Bonds	Not less than 40%

*IPO – initial public offering of shares
 * S&P500 Index features 500 leading U.S. publicly traded companies, with a primary emphasis on market capitalization.

PROSPECTIVE INVESTOR: This product is intended only for qualified investors (Law No. 240/2013 Sb., on Management Companies and Investment Funds, Section 272 - Qualified Investor). The product is suitable for investors who want to build their portfolio with investments with a higher yield potential and are willing to bear the risk of loss.

What are the risks, expected income and expenses

SUMMARY RISK INDICATOR (SRI)

<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>	<u>6</u>	<u>7</u>
----------	----------	----------	----------	----------	----------	----------

NOTIFICATION

The SRI indicator assumes that investing in this product is for 3 years minimum. The actual risk can vary significantly if you request a return on investment prematurely. In case of an early exit, you will have to pay an additional commission.

The Summary Risk Indicator (SRI) helps to compare the risk level of the relevant product with the risk levels of other products. It demonstrates how great is the possibility that the product may lose money due to changes taking place in the market. This risk indicator shows how possible it is that the product will lose money due to movements in the markets. We classified this product as 2 out of 7, which is a lower-than-average risk class.

Why does the Fund fall into this particular category?

The Fund invests primarily in low-risk financial instruments such as bonds, as well as stocks of companies in the S&P500 Index and, to a lesser extent, stocks of companies conducting IPOs on the U.S. stock market. This sector of investment is low risk because the bulk of the portfolio is government bonds or sovereign bonds as a financial debt instrument issued by the national government to support government spending.

Risks of significant importance that are not sufficiently reflected by the indicator:

Default Risk. Assessing default risk is a necessary step in evaluating government and corporate bonds. Since high-quality bonds tend to have low default rates, assessing default risk for such financial instruments is generally more important than assessing the severity of losses in the event of default.

Thus, default risk is a key factor in determining price and yield. Higher default risk typically corresponds to higher interest rates, and bond issuers with higher default risk will often have difficulty accessing capital markets.

Yield scenarios

The table shows the returns you could earn over the next 3 years under various scenarios, assuming you invest \$100,000. The scenarios shown represent an assumed estimate of future performance and are not an exact figure. Returns may vary depending on how the market performs and how long you maintain your investment.

The figures given include all costs (commissions) incurred for the product itself, where applicable. But these figures do not take into account the taxation to which your income is subject in your jurisdiction.

Investment scenarios		1 year	2 years	3 years Рекомендуемый инвестиционный период
Unfavorable scenario	Amount of investment including income/losses	\$93 060 -6,94%	\$95 069 -3,97%	\$94 119 -3,97%
Moderate scenario	Amount of investment including income/losses	\$101 400 1,40%	\$115 170 4,7%	\$126 687 4,7%
Favorable scenario	Amount of investment including income/losses	\$105 100 5,10%	\$124 932 8,55%	\$143 557 8,55%

What will happen in case of insolvency or liquidation of an asset management company?

The investors' assets under management are not the property of the asset management company High Tech Investment Fund s.r.o. and are separated from the property of High Tech Investment Fund s.r.o. All the investors' assets are in investments or in separate accounts of High Tech Investment Fund s.r.o. In case of insolvency or liquidation of High Tech Investment Fund s.r.o. all assets of the fund will be divided among individual investors according to their share of total assets.

The effect of investment-related expenses on your return

The reduction in yield (RIY) shows how the total costs that you pay will affect the return on your investment. Total costs take into account one-time, current and additional expenses. The table shows an approximate calculation of commissions and expenses related to investments based on a moderate return scenario for 3 different investment periods. These figures represent a probable estimate of fees and expenses and are not an accurate indicator. They include possible early termination fees. The data assumes that you are investing 100,000 USD and is calculated based on a Moderate scenario. These figures are estimates and may change in the future.

Calculation according to a Moderate scenario	1 year If you request an early exit after 1 year	2 years	3 years Recommended investment period
Total costs (\$)	\$8 600	\$5 830	\$6 413
Reduction in yield (RIY) per year (%)	7,82%	4,82%	4,82%

What are the costs associated with the investment?

This table shows the impact of various types of commissions and expenses on annual income/capital based on a Moderate scenario.

One-time expenses	Entrance fee	0%	The impact of the costs you pay when you enter the investment.
-------------------	--------------	----	--

	Exit fee	0%	The impact of the costs you pay when you exit investing.
	Early exit fee	3%	The early exit fee is applied if the investment period specified in the contract is not reached, which means early termination of the investment contract
Current expenses	Portfolio transaction costs	0%	The impact of costs on the purchase and sale of the main investments in the product.
	Other current expenses	3%	Management and consulting fees are paid to the HTIF for its services related to the management of the Fund's assets. The commission for management and consulting is calculated and paid for the performance as of the last day of evaluation of each month in the amount of up to 0.25% per month.
Additional expenses	Remuneration for capital gains	1,8%	This commission is 20% of the received investment income in the billing period and is calculated on the principle of <i>high water mark</i> . The <i>billing period</i> is understood as the period starting on the first day of each month and ending on the last day of each month. This commission is intended to reward the work of investment managers

How long should I hold this investment?

The recommended investment period is 3 years. At the end of the investment period, reinvestment is possible. Early exit is possible no earlier than 6 months and with the consent of the asset manager. Requests are processed within 14 days of receipt based on available uninvested capital. The remaining invested capital will be paid to the Investor after the end of the lock-up period. For already invested capital, the lock-up period lasts up to 4 months. Reinvestment is not allowed in case of a request for a full or early exit.

How do I file a complaint?

You can file a complaint by e-mail info@htif.ai (a scan of the complaint with a signature), on the website www.htif.ai or send a complaint in hard copy to the address: Svetova 523/1, 180 00 Praha, Czech Republic.
